## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 10, 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Lundquist et al (US 5195968). Lundquist discloses a catheter steering mechanism comprising a catheter 340, a housing 420, a flexible element 360, 370 that deflects the distal end by pushing and pulling (Col. 8, lines 10-30), and a first tubular support 375, coupled to the actuator via the wires, that constrains the lateral movement of the flexible element. See Figs. 7-10, 28.

### ***Allowable Subject Matter***

3. Claims 2-9, 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 11-18, 23-25, 26-30 are allowed.

### ***Response to Arguments***

5. Applicant's arguments, see pages 8-10, filed 1/31/2007, with respect to the rejection(s) of claim(s) 1, 2, 10-12, 16, 19-29 under Hayzelden have been fully considered and are persuasive.

Art Unit: 3763

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Lundquist.
